We have always mentioned that the asset quality of all businesses continues to perform well, except for the micro-finance book, which was an issue for the entire industry in FY25 and FY26. Hence, with the micro-finance issue behind us, the GNPA and NNPA have come down to healthy levels of 1.61% and 0.48% respectively. The provisions during Q4 FY26 have come down to the lowest level of two years, at 1.63% of loans, which is equivalent to 1.18% of assets. The first month of Q1FY27 has started strong for deposits, and the bank is confident of growing its deposit business healthily in line with past trends."
